CORRECTED FILING RECEIPT

\*OC00000007482808\*

Date Mailed: 02/15/2002

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

OPTICAL READER SYSTEM COMPRISING LOCAL HOST PROCESSOR AND OPTICAL  
READER

Preliminary Class

235

---

**LICENSE FOR FOREIGN FILING UNDER**  
**Title 35, United States Code, Section 184**  
**Title 37, Code of Federal Regulations, 5.11 & 5.15**

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

OPTICAL READER SYSTEM COMPRISING  
LOCAL HOST PROCESSOR AND OPTICAL READER

Cross References to Related Applications

5           The present application is a continuation-in-part  
of U.S. Patent Application Serial No. 08/839,020 filed  
April 23, 1997, which, in turn, is a continuation-in-  
part of U.S. Patent Application Serial No. 08/697,913,  
filed September 3, 1996, which issued as U.S. Patent No.  
10   5,900,613 on May 4, 1999.

Background of the Invention

Field of the Invention

15           The present invention relates to hand held  
optical reading devices, and is directed more  
particularly to a hand held optical reading device  
configured to be controlled with use of a local host  
processor.

20   Description of the Prior Art

One dimensional optical bar code readers are well  
known in the art. Examples of such readers include  
readers of the SCANTEAM® 3000 Series manufactured by  
Welch Allyn, Inc. Such readers include processing  
25   circuits that are able to read one dimensional (1D)  
linear bar code symbologies, such as the UPC/EAN code,  
Code 39, etc., that are widely used in supermarkets.  
Such 1D linear symbologies are characterized by data  
that is encoded along a single axis, in the widths of  
30   bars and spaces, so that such symbols can be read from a
